Nursing is the largest healthcare field. Three out of five nurses work in hospitals. Many nurses work part-time.

Nursing requires both physical stamina and emotional stability. Nurses must be able to follow orders and direct others.

Other qualities important to the field include orientation to detail, sympathy and concern, responsibility, and the ability to handle stress and emergency situations.

There are multiple educational paths to acquire the Bachelor of Science Nursing (BSN) degree and the Registered Nurse (RN) designation. Research alternatives such as accelerated BSN programs or Master's Entry programs.

All states regulate nursing by requiring licensure. Investigate individual state requirements if planning to relocate.

Earn a master's degree to prepare for advanced practice nursing including: clinical nurse specialist, nurse practitioner, nurse midwife, nurse anesthetist, and administration. Earn a doctoral degree for research or teaching at a university.

Many opportunities outside of traditional nursing exist for RN's who want to work in non-clinical roles. Research the skills, experiences, and degrees necessary to attain these positions.
